# Accessories for Millenium **Modbus RS485 Interface**

- > Modbus RTU client/server standard widely used in industry
- > Polarize or not your Modbus network according to your needs
- > The removable connector allows to unplug a product without cutting the network
- > Include End Of Line resistor
- > Direct connection with screw terminals without the need of external accessories

Modbus Interface RS485 P

Modbus Interface RS485

| Selection guide          |                    |             |  |  |
|--------------------------|--------------------|-------------|--|--|
| Туре                     | Polrization inside | Part number |  |  |

#### Description:

The Millenium is the latest product in Crouzet's Millenium series. This is a compact, networked, and communicative PLC. Its flexible deployment and extensive configuration options with various extensions make it suitable for a wide range of applications.

Accompanied by powerful, intuitive software, it will support you throughout your automation needs.

For more information about *Millenium*: please visit <u>www.crouzet.com</u>
