

Lightning Surge Protectors for Electronics Equipment M-RESTER

LIGHTNING SURGE PROTECTOR FOR STANDARD SIGNAL LINE

(ultra-slim)

Functions & Features

- High discharge current capacity 20 kA (8 / 20 μ s), 1 kA (10 / 350 μ s)
- Ultra-thin 7-mm-wide module can be mounted in high density
- Excellent protection employing multi-stage SPD circuits
- DIN rail mounting and grounding
- Shield terminal provided

MODEL: MD7ST-[1][2][3][4][5]

ORDERING INFORMATION

- Code number: MD7ST-[1][2][3][4][5]
- Specify a code from below for each of [1] through [5].
(e.g. MD7ST-24FF00/Q)
- For the safety approval code 2, specify the product's destination country using Ordering Information Sheet (No. ESU-8057).
- Specify the specification for option code /Q
(e.g. /C01)

[1] NOMINAL VOLTAGE

- 24: 24 V DC
- 60: 60 V DC

[2] SHIELD TERMINAL (line / earth)

- FF: Floating / Floating
- FG: Floating / Grounding
- GF: Grounding / Floating

GG: Grounding / Grounding

[3] LOOP DISCONNECT FUSE

- 0: Without
- 1: With (ATEX intrinsic safety not available)

[4] SAFETY APPROVAL

- 0: None
- 2: ATEX intrinsic safety

[5] OPTIONS

- blank: none
- /Q: With options (specify the specification)
(ATEX intrinsic safety not available)

SPECIFICATIONS OF OPTION: Q

COATING (For the detail, refer to M-System's web site.)

- /C01: Silicone coating
- /C02: Polyurethane coating

RELATED PRODUCTS

- Loop disconnect fuse (model: MD7F)

GENERAL SPECIFICATIONS

- Construction:** Slim-sized front terminal structure
- Degree of protection:** IP20
- Connection:** Euro terminal block (torque 0.3 N·m)
- Applicable wire size:** 0.2 - 2.5 mm², stripped length 8 mm
- Grounding:** DIN Rail
- Housing material:** Flame-resistant resin (black)
- Loop disconnect fuse:** Current rating 250 mA
(Separates the protected device from the power source when the former fails in the shortcircuit mode.)

INSTALLATION

- Operating temperature:** -25 to +85°C (-13 to +185°F)
(See Safety Parameters for use in a hazardous location.)
- Operating humidity:** 30 to 90 %RH (non-condensing)
- Mounting:** DIN Rail (TH35-7.5, 1-mm-thick)
Oxide film on the surface of an aluminium DIN rail may lower the electric conductivity between this module and the ground. Use a steel or copper rail.
- Weight:** 70 g (2.5 oz)

PERFORMANCE

MODEL NO.	NOMINAL VOLTAGE	MD7ST-24				MD7ST-60			
		SHLD TERMINAL	FF	FG	GF	GG	FF	FG	GF

DESCRIPTIONS

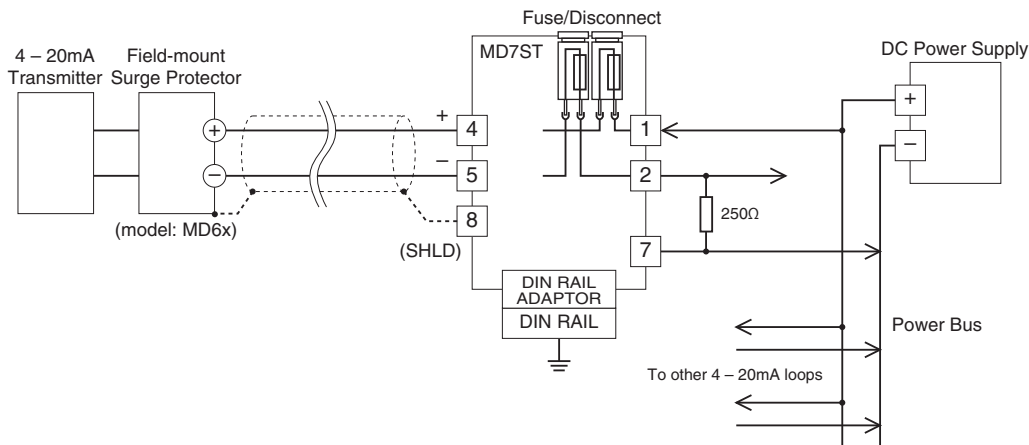

■ SELECTING SHIELD TERMINAL TYPE

- The surge protector has a dedicated shield terminal effective for easy shield wiring and surge protection.
- Review the shield method (grounding, non-grounding, connecting to SG, etc.) required by the protected device or system.
- There is no electrical effect to the shield by installing the surge protector, but an appropriate shield terminal type must be selected to suit user applications.
- Refer to the flow chart below to choose.

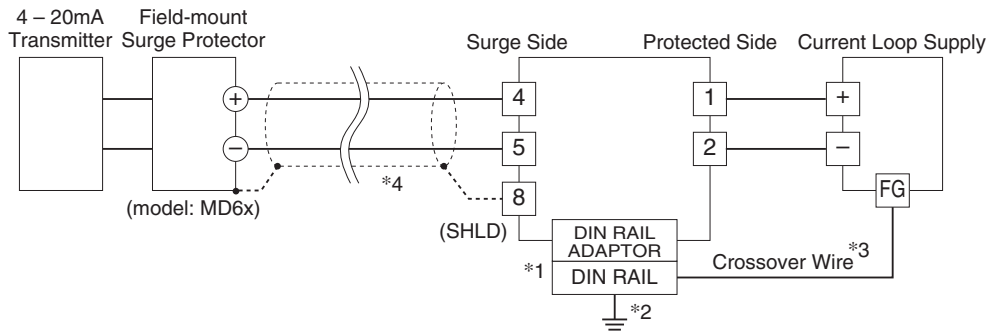

■ SELECTING LOOP DISCONNECT FUSE

- Specify 'Loop disconnect fuse' type when multiple transmitters are connected to single power bus.
- Loop disconnect fuse is used to separate a transmitter loop from the power bus when it fails in the shortcircuit mode.

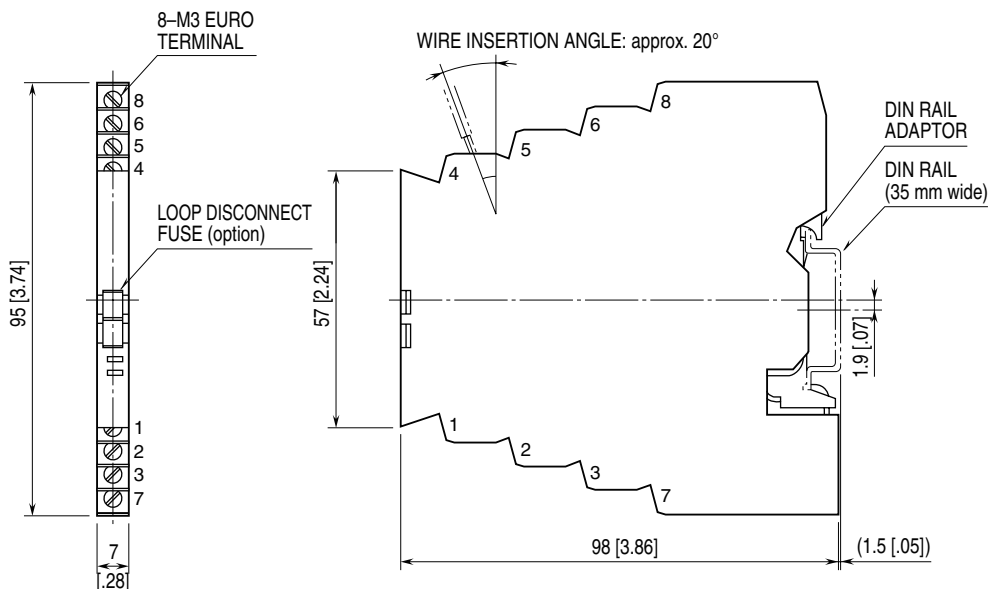

CONNECTION EXAMPLES

- *1. Oxide film on the surface of an aluminium rail may lower the electric conductivity between this module and the ground. Use a steel or copper rail.
- *2. Be sure to ground the DIN rail. Recommended grounding resistance $\leq 100\Omega$
- *3. Cross-wire between the DIN rail and the metal housing of the protected device to equalize the earth potential. Ground only the surge protector when the protected device has no ground terminal.
- *4. Shield wiring method is an example. Proceed according to the system requirements.

EXTERNAL DIMENSIONS & TERMINAL ASSIGNMENTS unit: mm [inch]
