This fast, high-gain, ultrasonic proximity sensor detects objects as small as 0.076 mm (0.003") in width at a speed of 400 inches per second.

Where very small target sensing applications require fast, repeatable, reliable, and precise on/off control, the high-frequency, fixed-window SUPERPROX® Model SM607 series ultrasonic proximity sensors are the ideal solution. Combining new and unique piezoelectric transducer and microprocessor technology, this “tough little prox” from Hyde Park combines high speed and high sensitivity in the reliable detection of very small objects and edges. This sensor series has fixed sensing windows as small as 3 mm (0.125") within sensing ranges up to 63.5 mm (2.5"). The sensor’s advanced ultrasonic technology, the world’s finest, allows for a deadband as short as 38.1 mm (1.5"), resulting in a quicker decay of “cross talk” and the capability of closer object detection. Another benefit of the technology is revealed in a sampling rate of 0.5 ms, 2000 samples per second and the detection of small reflective surfaces moving past the sensor at 400 inches per second.

For sensing applications requiring connection to a DeviceNet network, the flat-profile models in this series are available with this capability as an optional selection.

By virtue of its very high gain and speed, the SM607 noncontact sensor offers reliable detection of objects as small as 0.076 mm (0.003") thick or .0127 mm (0.005") diameter regardless of material, color, or shape. These include items such as thin wires, threads, floss, filaments, electrical connections, fine glue beads on box tops, bag seams, and clear optical extrusions. The high gain and speed work together to create a new edge detection system that can be used on high-speed container lines in detecting tamper-proof safety seals, labels, and caps. Other applications include detecting paper and film edges, tape on packages, web edges, bag seams, and wherever there’s a need to upgrade a metal prox function. The sensors detect all materials, transparent or opaque, liquid or solid.

With protection ratings of NEMA 4X (indoor use only) and IP67, these sensors are impervious to changing light conditions, colors, noise, dust, 100% humidity, caustic chemicals, and other hostile environments. They are resistant to most acids and bases, including most food products. The sensing transducer is made of silicone rubber and the sensors are CE certified. Easy to install, the sensors are available in three different housing styles.

The 18 mm barrel housing sensors are available in either ULTEM® plastic (standard) or SS303 stainless steel. The "flat-profile" housing sensors are available only in ULTEM® plastic. With all SUPERPROX® sensors, cable and connector styles are available.

Operating on 12 to 24 VDC, these 500 kHz sensors are equipped with sinking type (NPN) and sourcing type (PNP) outputs, a green LED to indicate power “on” and an amber LED to indicate when the object is detected within the fixed window. The Model SM607 barrel and

SUPERPROX®
Ultrasonic Proximity Sensors

Small Target Sensing

- Fast response - 0.5 ms sampling rate
- Fixed sensing window
- Self-contained, 18 mm barrel or flat-profile housing styles
- Ideal for the precise detection of thin edges, as in labels and tamper-proof seals
- Field programmable capability in 18 mm and flat-profile models
- DeviceNet Capability available in flat-profile models
- CE certified

flat-profile-style proximity sensors are today’s answer for very small object detection and improved productivity throughout the plant.

**Operation**

The Model SM607 series is a self-contained, pulse-echo device that both transmits and receives sonic energy over a sensing range of up to 51 mm (2”). These sensors use the latest ultrasonic technology with a discriminating microprocessor that allows the sensor to ignore all surrounding sonic interference and detect only the designated object. An object is detected when it is at or within the fixed sensing window.

**How does it work?**

During setup and operation, these SM607 series sensors continually and accurately measure the elapsed time of every pulse echo reception between each pulse transmission. The transmitted pulse begins a time clock to register the elapsed times for the received pulse echoes. Given the elapsed time, the sensor software calculates the distance traveled out to the object and back to the sensor, using the formula, \( D = \frac{TV}{2} \), where: \( D \) = distance from the sensor to the object; \( T \) = elapsed time between the pulse transmission and its echo receptions; \( V_s \) = the velocity of sound, approximately 1100 feet per second.

During operation, the calculated distance (\( D \)) between the sensor and the object is compared to the distances between the sensor and the fixed window limits. These limits are shown in the illustration as Dwi and Dwo. If D is at or within the fixed window limits, an output change takes place and remains unchanged until the echo either does not return or it returns from outside the fixed window limits. As shown below, Hyde Park offers normally open (N.O.) or normally closed (N.C.) (sinking and sourcing) output models available for discrete on/off sensing applications.

**Model Reference Guide - SM607 Series**

Use the guide below to ensure the correct model number is specified for the application. Please note that not all sensor model combinations are available.

**EXAMPLE MODEL:**

### Mounting
The Model SM607 series sensors should be mounted in brackets that allow them to be adjusted for proper alignment. Hyde Park offers the Model AC226 stainless and polyamide conveyor-rail clamp/bracket set, Model AC227 large, right-angle, stainless mounting bracket, Model AC228 small, right-angle, stainless, mounting bracket and Model AC231 straight, stainless, mounting bracket and Model AC232s-shaped, stainless, mounting bracket which are illustrated, with dimensions, on Pages 4-104 and 4-105.

S..SS303 stainless steel - 18 mm barrel housing

*NOTE: Contact the factory for DeviceNet communications capability in the flat-profile models

*ULTEM® is a registered trademark of The General Electric Company.

#### Electrical Wiring
Regardless of model style, the wiring and conductor colors for the Model SM607 series sensors are the same.

NPN Sinking and PNP Sourcing

**Connector Style Pin Assignments**

**General Specifications**

- **Sensing**
  - Ranges: Up to 51 mm (2”)
  - Spans: From 3.18 mm (1/8”) to 38.1 mm (1.5”)
  - Window Position, Initial Accuracy: ± 1.59 mm (0.062”)
  - Window Position Repeatability: ± 0.69 mm (0.027”)
  - Detection Benchmarks: 0.076 mm (0.003”) width at a distance of 51 mm (2”)
  - Sonic Cone Angle: 7°
  - Sonic Frequency: 500kHz
- **Power Requirements**
  - Supply Voltage: φ to 24 VDC ± 10%, regulated supply
  - Current Consumption: 70 mA max. (excluding load)
  - Power Consumption: 1.7 W max. (excluding load)

**Output**

- NPN Sinking: 0 to 30 V, 100 mA max.
  - The sinking output is “off” when the sensor is not detecting an object (N.O.)
- PNP Sourcing: 0 to 30 V, 1 A max.
  - The sourcing output is “off” when the sensor is not detecting an object (N.O.)

**Response Time**

- "On" 0.5 ms, "Off" 0.5 ms

**Indicators**

- Green LED: power “on”
- Amber LED: “on” if object is detected within the window, regardless of output polarity (N.O./N.C.) style. Connector model using cable with built-in LEDs: “on” if NPN output is low.

**Connections**

- Cable Style Models:
  - 24 AWG, foil shield, lead-free, PVC jacket, 4-conductor, 3 meters (10’) long
  - Connector Style Models: 24 AWG, foil shield, lead-free, PVC jacket 4-conductor, right angle “micro” style

**Protection**

- Power Supply: current-limited over-voltage, ESD, reverse polarity
- Outputs: current-limited over-voltage, ESD, over-current.

**Environmental**

- Operating Temperature Range: 0° to 60°C @ 12 VDC supply
- Storage Temperature Range: -40° to 100°C (-40° to 212°F)
- Operating Humidity: 100%
- Protection Ratings: NEMA 4X (indoor use only), IP67
- Chemical Resistance: Resists most acids and bases, including most food products.

**Agency Approvals**

- CE Mark: CE conformity is declared to: EN61326:1997 (annex A, industrial) including amendment A1:1998, EN55011 Group1 Class A.
- Declaration of Conformity available upon request

**Construction**

- Dimensions: Barrel
  - Cable Model: 18 mm dia. x 1 mm threaded housing x 65 mm (2.55”) long
  - Connector Model: 18 mm dia. x 1 mm threaded housing x 102 mm (4”) long
- Flat-profile
  - Cable Model: 30 mm (1.182”) H x 16.25 mm (0.640”) W x 93 mm (3.66”) L
  - Connector Model: 30 mm (1.182”) H x 16.25 mm (0.640”) W x 84.4 mm (3.32”) L
- Housing:
  - Shock and vibration resistant
  - Case: ULTEM® plastic - (FDA Approved)
  - (SS303 stainless steel available only in 18 mm barrel-style)

**Transducer Face:** Silicone rubber - gray

**Accessories**

- **18 mm Barrel Mounting Hardware and Cables**
  - Model AC117: Right-angle, M12 micro, 4-conductor, connector/cable assembly, 5 m (16’) with built-in LED’s for barrel connector-style prox sensors
  - Model AC127: Straight, M12 micro, 4-conductor, connector/cable assembly, 5 m (16’), with built-in LEDs for barrel connector-style prox sensors
  - Model AC226: Stainless and polyamide conveyor-rail clamp bracket set
  - Model AC227: Large, right-angle, stainless, mounting bracket
  - Model AC228: Small, right-angle, stainless, mounting bracket

- **Flat-profile Mounting Hardware and Cables**
  - Model AC130: Straight, M12 micro, 4-conductor, connector/cable assembly, 5 m (16’), for flat-profile, connector-style prox sensors
  - Model AC231: Straight, stainless, mounting bracket
  - Model AC232: S-shaped, stainless, mounting bracket AC241 Steel/black oxide, 45° angle, label edge mounting bracket used with SUPERPROX SM6X7A-A08-01FP or SM6X7A-A08-11FP flat-profile label sensors
  - Model AC241: Steel/black oxide, 45° angle, label edge mounting bracket used with SUPERPROX® SM6X7A-A08-01FP or SM6X7A-A08-11FP flat-profile label sensors
