Customer Survey Responses

"The sensors worked better than anything else we had, so we converted all our labelers to Lion."

"I was told that Lion Precision made the best sensor for clear label application. They didn't lie. Have your sensors on two of our main labelers and will be replacing others as they need it."

"The best out there. Seems to last forever and our customers usually buy more to put on other machines."

Specialized Versions

These sensors use LRD2100 sensing technology in unique applications.

LRD3100

Clear Label Technology for Small Spaces

Same great performance as the LRD2100 in smaller spaces.

Sensor head can be used with supplied baseplate as pictured, or a baseplate system can be designed into the machinery.

10" (25.4mm) cable from main body to sensor head.
Same specifications as the LRD2100.

LRD4100

Vertical, Multiple Mount for Slitter/Rewinders

Thin, vertical design for accurate and reliable counting of multi-lane clear or paper labels at rewind speeds.

Proper mounting of the sensor is critical to reliable operation, see Lion Precision TechNote, LT04-0020, *LRD4100 Label Sensor Mounting Considerations* available at www.labelsensors.com. Same specifications as the LRD2100.

LRD5100

Tear-Tape Sensor

The LRD5100 senses the presence/absence of tear-tape on overwrap film. Works with all tear-tape materials and nonmetallic overwrap.

Same specifications as the LRD2100.
