Sensor Position Adjustment

- Translate the transmitter or receiver, up/down and left/right. When the setting is optimal, the Output status LED (yellow) is lit (Light-on mode).
- Check sensor operation with the object and adjust the sensor, if necessary.

Output mode setting: Light-On or Dark-On (Light-On by default)

Sensor Sensitivity Adjustment

For accurate detection, follow the configuration below. (eg. Objects with holes or small size to obstruct the light beam).
