

Data sheet MATRIX light guide

Cross-section converter light barrier with silicone protective sleeve for Ex zone 1, 2, 21, 22

Light guides suitable for optical sensors M30 x 1.5. The light guides are mounted with a union nut M30 x 1.5. This is included in the scope of delivery. (Union nut M30 // 20mm)

Function	Light barrier (The manufacturer's installation instructions must be observed).
Structure	2-armed
Arm lengths	Fixed, cannot be cut to length
Fibre	Glass fibre bundle
Active area	Fibre bundles mixed or separated
Coat	Silicone
Bending radius	50mm
Headboard	Steel
Operating temperature	-20°C to 120°C
Working distance	Dep. on the arm length from the light guide and the sensor performance
Light frequency	Preferably infrared
Light attenuation	Yes

25.11.21/PH
