# XXA30P2VM12

Ultrasonic sensors XX, ultrasonic sensor, plastic, cylindrical M30, angled, 2 m, 0...10 V

#### Main

| Range of product              | Telemecanique Ultrasonic sensors XX                                |  |
|-------------------------------|--------------------------------------------------------------------|--|
| Sensor type                   | Ultrasonic sensor                                                  |  |
| Series name                   | General purpose                                                    |  |
| Sensor name                   | XXA                                                                |  |
| Sensor design                 | Cylindrical M30                                                    |  |
| Detection system              | Diffuse (with 90° head)                                            |  |
| [Sn] nominal sensing distance | 2 M adjustable with remote teach push-button 2 m software with kit |  |
| Material                      | Plastic                                                            |  |
| Type of output signal         | Analogue                                                           |  |
| Wiring technique              | 5-wire                                                             |  |
| Analogue output function      | 010 V                                                              |  |
| [Us] rated supply voltage     | 24 V DC with reverse polarity protection                           |  |
| Electrical connection         | Male connector M12 5 pins                                          |  |
| [Sd] sensing range            | 0.1552 m                                                           |  |
| IP degree of protection       | IP65 conforming to IEC 60529<br>IP67                               |  |

#### Complementary

| Complementary                                     |                                                        |
|---------------------------------------------------|--------------------------------------------------------|
| Enclosure material                                | PBT                                                    |
| Front material                                    | Epoxy<br>Rubber<br>Resin                               |
| Supply voltage limits                             | 1430 V DC                                              |
| Function available                                | With synchronisation mode Software configurable        |
| [Sa] assured operating distance                   | 0.1552 m (teach mode)                                  |
| Blind zone                                        | 155 mm                                                 |
| Transmission frequency                            | 120 kHz                                                |
| Repeat accuracy                                   | 0.1 %                                                  |
| Deviation angle from 90° of object to be detected | -1212 °                                                |
| Minimum size of detected object                   | Cylinder diameter 1 mm at 1.4 m                        |
| Status LED                                        | Output state: 1 LED (yellow) Echo state: 1 LED (green) |
| Current consumption                               | 65 mA                                                  |
| Maximum switching capacity                        | >= 1 kOhm overload and short-circuit protection        |
| Setting-up                                        | Teach mode<br>Configurator software                    |
| Maximum delay first up                            | 250 ms                                                 |
| Maximum delay recovery                            | 200 ms                                                 |
| Marking                                           | CE                                                     |
| Threaded length                                   | 74.7 mm                                                |
| Height                                            | 30 mm                                                  |
| Width                                             | 30 mm                                                  |
| Depth                                             | 129.6 mm                                               |
| Net weight                                        | 0.1 kg                                                 |
|                                                   |                                                        |

#### Connections

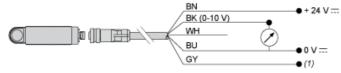

## **Connector Wiring**

- (1): Synchronization
- (2): External setting pushbutton or XXZPB100 remote teach pushbutton.

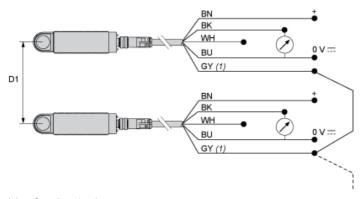

| Pin number | Wire color | Description     |
|------------|------------|-----------------|
| 1          | BN: Brown  | + 24VDC         |
| 2          | WH: White  | Input teach     |
| 3          | BU: Blue   | 0 VDC           |
| 4          | BK: Black  | Output          |
| 5          | GY: Grey   | Synchronization |

## Wiring Scheme. Analog Output

(1): Synchronization 0-10 1 kΩ...∞

# Wiring for the Synchronization Function (Side by Side Application)

(1): Synchronization

D1: 1/8 Sn BN: Brown WH : White BU: Blue BK: Black GY: Grey

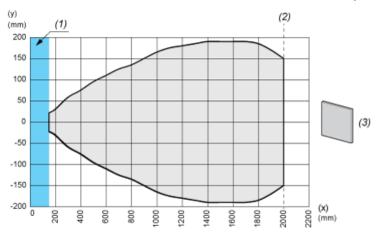

NOTE: Up to 8 sensors can be synchronized to operate side by side by electrically connecting all pin no.5 (grey) wires together.

To synchronize more than 8 sensors, a PLC output can be used (the pins no.5 must be simultaneously driven by the rising edge of a pulse).

# Product data sheet **Performance Curves**

## **Performance Curves**

## Detection Curve with 100 x 100 mm / 3.94 x 3.94 inches Square Target

(X): Target distance

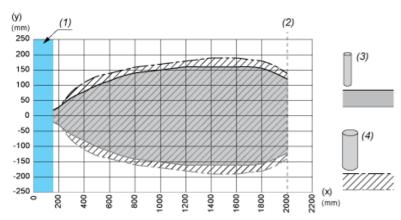

(Y): Detection limit

(1): Blind zone: 155 mm / 6.10 inches

(2): Sn max.

(3): 100 x 100 mm / 3.94 x 3.94 inches stainless steel plate

## **Detection Curve with Round Bar**

(X): Target distance (Y): Detection limit

(1): Blind zone: 155 mm / 6.10 inches

(2): Sn max.

(3): Ø 10 mm / 0.394 inches stainless steel cylinder (4): Ø 25 mm / 0.984 inches stainless steel cylinder
